STATUTORY GRAIN FREIGHT RATES

The Western Grain Transportation Act (WGTA) confers upon the National Transportation Agency (NTA) the authority, under Section 35, to prescribe the annual rate scale for the movement of western grain by rail on or before April 30th in respect of the next crop year. The purpose of this publication is to provide producers and other interested groups the information on Statutory grain freight rates from local delivery points to the West Coast ports of Vancouver and Prince Rupert, and to Thunder Bay.

The total Statutory rates will increase by about 0.17 per cent during the 1989-90 crop year from the rates in the 1988-89 crop year. Producers' share of Statutory rates would increase by about 7.4 per cent over the rates the producers were to pay under the WGTA formula in 1988-89. Producers' share of Statutory rates during the 1988-89 crop year was reduced by an average of $1.11 per tonne, when the federal government decided to pay $35 million to the railways through a special warrant, as part of the producers' share of rate increase.

On the basis of grain freight rates paid by the producers in 1988-89, the producers' share of rates would increase by about 23.8 per cent during the 1989-90 crop year, i.e. from an average of $7.27 per tonne in 1988-89 to $9.00 per tonne in 1989-90.

The following is a brief description of the information contained in this publication.

- The publication shows the local shipping points alphabetically, the railway which serves the point, the mileage to port upon which the freight rate is based, the base rate scale, the total 1989-90 rail freight rate, the amount of rail freight rate to be paid by the federal government, and the producer share prescribed under the WGTA.
- Competitive points are those delivery points served by both railways. Contiguous points are those delivery points which are close enough to another rail line that the grain could readily move to delivery points on either line. The freight rate from a competitive or contiguous delivery point is normally based on the lower mileage of the two railways.
- The West Coast port parity concept included in the Statutory rate was retained under the Western Grain Transportation Act. Under port parity, westbound freight rates from either Edmonton or Calgary to Vancouver or Prince Rupert are the same.

- The mileage base is the railway mileage block used to determine the freight rate. With the exception of differences resulting from competitive and contiguous delivery points or adjustments for West Coast port parity, the mileage used is the shortest mileage to port. The actual distance grain travels enroute to port may be greater than the mileage used for rate-setting purposes.

- The base rate scale is a schedule of distance-related rates determined in 25-mile increments. Essentially, the base rate scale is the old Crow rate with a number of anomalies removed. The base rate scale is distance related and, with the exception of competitive and contiguous delivery points, does not take any other factors into account.

- The total freight rate is the rate paid to the railways for each tonne shipped under the Western Grain Transportation Act. The total rate is determined annually by the National Transportation Agency. Applying the formulas prescribed in the Western Grain Transportation Act, the National Transportation Agency determines an annual rate multiple. The base rate scale is multiplied by this factor to determine the total freight rate from each shipping point to either the West Coast ports or Thunder Bay. The multiple for the 1989-90 crop year is 6.25, a very small increase from 6.24 for the 1988-89 crop year.

- The federal government share is the portion of the total freight rate paid by the federal government for each tonne shipped. The federal government's commitments are specified in the Western Grain Transportation Act and include the Crow Benefit, a share of future cost increases and any government contributions triggered by the safety net provisions in the Act.

- The WGTA producer share (rate paid by the producer) is the amount paid to ship grain from the local shipping point to port. This rate is the total freight rate less the federal government's share as determined by the formulas contained in the Western Grain Transportation Act. Under the Western Grain Transportation Act formulas, producers' share of the Statutory rates would increase to 29.7 per cent in 1989-90 from 24 per cent in 1988-89. The federal government's share would decrease to 70.3 per cent in the 1989-90 crop year from 76 per cent in 1988-89.
